**Neighborhood Assistance Program (NAP)**

The Neighborhood Assistance Program revitalizes communities

- The NAP tax credit program provides long-term sustainable support for locally-based revitalization organizations in low income neighborhoods.
- Corporate sponsors make dedicated contributions directly to local nonprofit organizations.
- The NAP program facilitates community collaborations that enhance revitalization efforts.

The NAP tax credit is an efficient use of limited public resources

- The NAP programs have a proven track record of building sustainable tax base and tax revenues to both local municipalities and the Commonwealth of Pennsylvania.
- A $500,000 NPP costs Pennsylvania only $400,000 and generates $900,000 in economic activity, including $32,000 new state tax revenue.

**Benefits:**

**Business Creation & Commercial Development**
Lawrenceville Corporation has facilitated the location and support of 36 new neighborhood businesses in two years, and facilitated or invested in the development of 44,366 SF of commercial space in 2013 – 14 worth $9 million.

**Housing**
South Side Local Development Company developed, facilitated or partnered on 235 housing units. An additional 980 new homes and apartments followed by private developers. More than $2.5 million in local taxes were generated from the 77 homes directly developed by South Side LDC.

**Workforce Development**
Oakland Planning and Development Corporation annually aids 600 job seekers through building resumes, interview preparation, and enhanced computer skills, and provided financial literacy classes to 337 adults struggling to make ends meet.

**Blight Remediation**
Wilkinsburg Community Development Corporation has helped 24 vacant properties become available to new owners through the Vacant Property Recovery Program, 17 property owners have renovated their building facades, and 19 vacant storefronts have been filled.

**The time has come to expand the NAP:** Originally created in 1971, the $18 million NAP allocation has never been raised. Adjusted for inflation, in 2014, this would be $105 million.
